

### Why integrated program for IITJEE AIEEE BITSAT?

Integrated preparation methodology revolves around National curriculum which facilitates a student to tackle all National level entrance exams like IITJEE AIEEE BITSAT & admission tests of other deemed universities effectively. This kind of approach provides flexibility in choosing an Institution, course of his/her choice after the results of various tests.

### What is the philosophy of course and how it is planned?

The course philosophy is very simple - focus on the fundamentals. The Integrated program goes beyond the limitations of conventional test preparation techniques and challenges the fundamental knowledge base. The sessions take you through the fundamentals of Physics Chemistry and Mathematics through relevant concepts and exercises to reinforce them. Only when you have a firm grasp of the basics do the actual test preparation sessions unfold. At PAGE, each topic is introduced in the depth and width it deserves with respect to its scope in IIT-JEE. This is followed by exhaustive numerical problem-solving exercises on these topics. Students are encouraged to first try on their own without the Instructors' assistance.

### How the program is introduced to me?

The PAGE Integrated Program is a direct response to students' persistent requests for a longer duration course that helps build strong foundations in Mathematics, Physics and Chemistry before tackling the specific needs of the entrance tests. This program tries to ensure that Junior college studies/work can go hand-in-hand with entrance preparation.

### Are all the Instructors experienced?

At PAGE, it is the people behind the process that add value to your education. At PAGE,

you will be trained by people with expertise in relevant subjects and are in tune with the latest exam patterns, they even solve the actual test on the test day, year after year to post them on the Institute's website.

PAGE faculty do much more than teach, they guide and encourage you to give your best.

### How often do you evaluate me?

Efficient time-management, and not complexity of the test itself, is what matters most in doing well. We have developed efficient evaluation methodology that lets you constantly assess your examination strategies and benchmark your performance at national level.

To ensure that you remain totally in tune with class activities at all times, we conduct weekly 90-minute tests. These are not of the IIT AIEEE pattern, rather are based on what was taught in the past week itself. A score less than 65 in any of these 30-part tests imply that preparation at home requires more diligence. Feedback is regularly conveyed to each student.

Modeled on the IITJEE AIEEE BITSAT, the all India test series is very popular amongst the student community with aspirants coming down every Sunday to take the tests in a simulated environment. The results give you a very accurate picture of the real thing. Detailed subject-wise analysis is provided to every student, to enhance his or her performance.

### Do you counsel students?

Our core teams of teachers discharge the responsibility of counseling students. Counseling enhances the performance of students and gives them that extra edge. Our counselors play a vital role at different phases of a student's preparation. Systematic tracking of performances, re-strategizing and regular reviews empower the students to handle any test taking situation...

### How the study material is designed?

Study material is updated, student centric and focused on logical sequence of subject content. Study material is changed each year, as per the trends in test patterns.

While designing the study material, we follow the tried and tested logic of mastering the fundamentals before moving on to practice tests. The flow of the material accommodates this logic. These are the core elements of our study material, which has been created by our knowledge partners, faculty using latest R&D, technology and Instructional Design techniques

### Is Intermediate subjects preparation included in the program?

The PAGE 2-Year Integrated program which is high on content spends adequate time on concept building and practice exercises. To derive the maximum utility from this course student needs to supplement the classroom sessions with a lot of practice at home. We take the complete responsibility of coaching the students comprehensively in all relevant subjects.

### Do you offer online support?

Yes through prep zone! For students who are 'hungry' for additional resources, our online tests offer more questions on various topics and at different levels of difficulty to be solved within a specified timeframe. One can test oneself at the IIT and AIEEE pattern. These testing facilities are over and above the regular classroom tests.

### Do you have hostel facility?

Yes, we have air-conditioned residential Hostels at Kompally for boys (8 Kms. from Paradise, Secunderabad) and at Bowenpally for girls.

Here are some frequently asked queries, we hope our answers address your apprehensions.
